Pure handmade soaps & natural cosmetics

flowerland

In **Flowerland** we are making traditional handmade soaps and natural cosmetics with pure vegetable oils and ingredients.

We are a small home business and we take pride in personally attending to every aspect of soap/cosmetics making, from selecting the ingredients and materials to packaging our products.

Our care for pure, high-quality products stems from our wish for a healthier and more natural way of life, as we know it from past generations, before industrialization and the wide-spread use of synthetic materials took over the markets.

**We only use vegetable oils** and fats in all our soaps. We do NOT use animal fats or chemical preservatives.

**The main ingredient** we use for all our soaps is pure virgin olive oil (more than 50%). Also, depending on the recipe, we use various vegetable oils known for their moisturizing and cosmetic properties, such as jojoba oil, avocado oil, shea butter, almond oil, coconut oil, etc. Finally, to enhance the protective properties of the soaps we add extracts and/or infusions from various flowers and herbs: calendula, chamomile, rosemary, walnut leaves, etc.

### Absolutely pure. No fragrances or colors.

Soaps in this category do not contain any fragrances or colors.

The moisturizing properties of olive oil and other oils used in each recipe (jojoba oil, shea butter, avocado oil, almond oil, coconut oil, etc) as well as the valuable properties of herbs (chamomile, calendula, rosemary, etc) make these soaps ideal for sensitive skin, infants and facial wash.

#### **Calendula**

With olive oil, palm oil, avocado oil and calendula extract

#### **Chamomile**

With olive oil, palm oil, avocado oil and chamomile extract

#### **Iris**

With olive oil, palm oil and avocado oil

#### **Anemone**

With olive oil, palm oil, cocoa butter and shea butter

#### **Amaryllis**

With olive oil, palm oil, shea butter and jojoba oil

#### **Honey**

With olive oil, palm oil, avocado oil, honey and beeswax

#### **Walnut leaf**

With olive oil, palm oil, avocado oil and walnut leaf extract

#### **Rosemary**

With olive oil, palm oil, avocado oil and rosemary extract

#### **Echinacea**

With olive oil, palm oil, shea butter, jojoba oil and echinacea extract

#### **Lemon balm**

With olive oil, palm oil, shea butter, jojoba oil and lemon balm extract

### Mild cleansing and protection. With delightful fragrances and colors.

Soaps in this category contain the same pure vegetable oils (olive oil, jojoba oil, shea butter, avocado oil, almond oil, etc). For those who can't resist the temptation of fragrances, we have added pleasant, delightful fragrances which are allergen free (they contain none of the 26 allergens listed in directive 76/778/EEC, 7th amendment, annex III).

#### **Dewdrop**

With olive oil, palm oil and shea butter

#### **Enchantment**

With olive oil, palm oil, shea butter and jojoba oil

#### **Chocolate**

With olive oil, palm oil and avocado oil

#### **Lavender woods**

With olive oil, palm oil and avocado oil

#### **Sea breeze (\*)**

With olive oil, palm oil and shea butter

#### **Brown magic (\*)**

With olive oil, palm oil and avocado oil

#### **Green apple**

With olive oil, palm oil and avocado oil

#### **Strawberry garden**

With olive oil, palm oil and shea butter

#### **Orchard fruits**

With olive oil, palm oil, shea butter and jojoba oil

#### **Hazelnut**

With olive oil, palm oil, shea butter and almond oil

#### **Garden path**

With olive oil, palm oil and avocado oil

### Good things come to those who wait...

We produce our soaps using one of the traditional methods, the so called "cold process", in which the glycerin produced during saponification remains in the final soap (it is not removed as in other methods). This makes the soap milder and gentler to the skin.

After removing the soap from the mold and cutting it, we let the soaps dry and "cure" for at least 6-8 weeks before packaging them for sale. This curing period is required so that the soap reaches its best properties (mildness, lather, long-lastingness).

### Don't forget:

our soaps do not contain any chemical preservatives or additives (e.g. to enhance lathering, etc). So please make sure to store them in a cool, dry place, away from direct or intense sunlight. Also, after each use, wipe the soap thoroughly from water and lather before letting it rest in the soap tray. This way, the soap will last longer and will give you every time its luxurious, rich and creamy lather.

(\*) this soap contains conventional fragrance.
